Cadet RIB 260

Model Overview:

The tapering buoyancy tubes, which are wider at the stern, make these RIB tenders better suited to the more reliable and easy to use four-stroke motors. The additional buoyancy associated with a padded* hull, provides the CADET Rib with an impressive load capacity 50% higher than that for a traditional tender. The wide diameter of its truncated-cone buoyancy tube ensures surprising stability, making it easy to steer, even in choppy seas. Its generous seating, flat deck (enabling a console to be fitted on the 310, 340 and 400 models) as well as the bow storage locker* make it uniquely comfortable, plus very easy to board and disembark.

*Only on CADET 310 Rib & 400 Rib

Plus Products:

- Progressive diameter buoyancy tubes
- Integrated lifting points
- Moulded non-slip deck
- Excellent performance on the water
